Introduction to Software Engineering

Project Assignment 2 (PA2)

Due date: 1/11/2026
Total points: 50 points

This is a project assignment which will be submitted by each team.
You have the following documents to be done and submitted.

a – Revised project plan and vision document – 2nd submission (5 points)

- Based on the comments in PA1 you need to update your project plan to fix the issues raised by the TA and make it clearer and more detailed. You need also detail the schedule and other sections with more information that you have now.
- Detail product functional and non-functional requirements, alternatives and competitors, user environments.

Details of what are changed and added must be provided in the Revision History of each document. Changes in the document must be highlighted using the blue font color.

The TA will grade the revised documents based on the following criteria:

- Whether changes are made to reflect the feedback from the TA.
- Whether the revised documents have sufficient content (based on the template provided).

c – Use-case model (5 points)

Based on the requirements documented in the vision document, model use-cases of the system in forms of use-case diagrams (one or several diagrams). Each diagram includes use-cases, actors and relationships among them. You can use StarUML, Visio or another tool to design the use-case diagram. Place the diagram in the use-case specification document (see below).

d – Use-case specification (10 points)

Detail each use-case in the use-case diagrams by filling the use-case specification document, focusing on name, basic flow, alternative flows, pre-conditions, and post-conditions. Use the template for use-case specification document provided in Moodle.

e – UI Prototyping (5 points)

Continue to revise the UI prototypes proposed in PA1. In this assignment, the team is required design the UI for at least 3 key use cases. The UI needs to reflect what are documented in the use-case specifications.

f – Project Execution and Tracking (20 points)

TA will evaluate groups in terms of execution and tracking: team collaboration, progress, reporting status, teamwork, etc.

g – Weekly report (5 points)

Prepare weekly reports for weeks doing this assignment. Fill out the template with all information required.

Submission Rules:

You must copy all documents to the directory named **PA2-Group[GroupId]** and compressed the whole directory to zip/rar file

For example: **PA2-Group01.zip**

Grading Criteria:

The assignment will be graded according to how well your team prepares the required documents using the information your team has at this time. Criteria include:

- English writing: easy to understand, few errors.
- Well-formatted texts, diagrams, charts.
- Level of completeness of the documents, based on the information available at this time.
- Each use-case must have a main flow.
- Use-case diagrams must include key use-cases that match the functional requirements documented in the vision document.
- UI design matches the use-case specifications.

- END -
