UI Prototyping

1. UC01 - Discover & Register for Activities

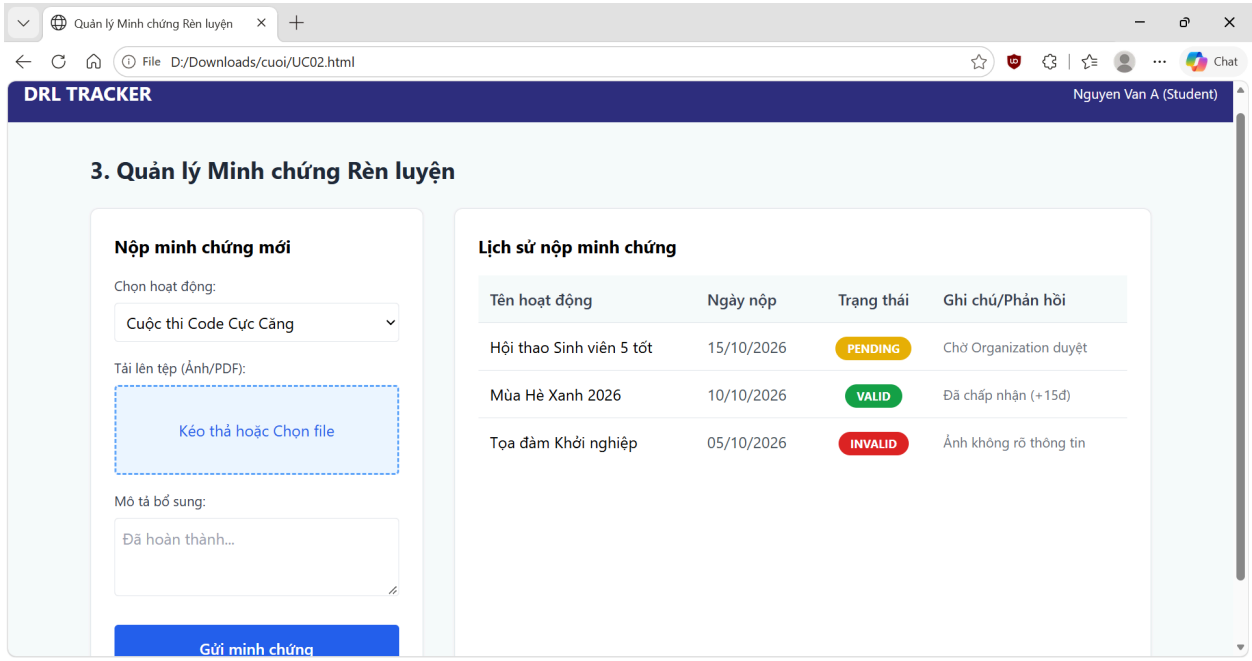

This interface allows students to search for extracurricular activities using keywords and filters (by unit or criteria). It displays activity details (points, deadlines) and provides a direct "Register" button. For activities that have passed their deadline, the button is visually disabled, perfectly reflecting Alternative Flow 1 of the UC01 specification.

UC01: Discover & Register for Activities

2. UC02 - Manage Evidence

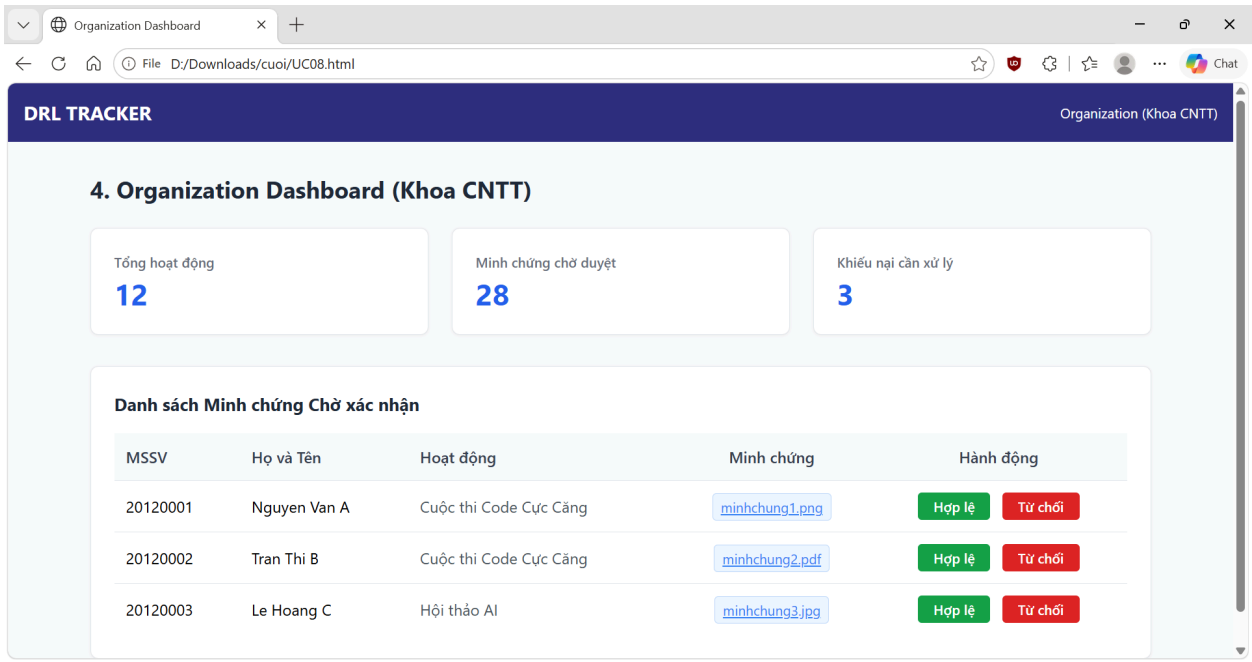

This screen provides an intuitive form for students to upload evidence files (images/PDFs) and add optional descriptions. The right panel displays the submission history table with real-time status updates (PENDING, VALID, INVALID) color-coded for clarity, which aligns with the post-conditions and workflows defined in UC02.

UC02: Manage Evidence

3. UC08 - Verify Evidence

This dashboard is designed for Organizing Units (e.g., Faculty of IT) to manage and process pending evidence. It includes a tracking table with student information, a link to view the submitted files, and quick action buttons ("Hợp lệ" / "Từ chối") to update the evidence status, directly matching the verification workflow documented in UC08.
